**SAE 12**

After reading Unit Two of Classroom discipline tick the appropriate boxes.

1. In a disciplined classroom it is easier to
 - a) spend time on organisational aspects.
 - b) activate students in the way teachers want.
 - c) promote silence.

2. There is arguably some positive correlation
 - a) quietness and the level of discipline.
 - b) noise and the level and learning.
 - c) discipline and a noisy classroom.

3. The fact that a teacher is in control of proceedings does not necessarily mean that
 - a) s/he is standing in front of the class telling everyone what to do.
 - b) the teacher is a strict disciplinarian.
 - c) s/he has prepared a satisfactory lesson plan.

4. The existence of a disciplined classroom
 - a) almost certainly means that learning is taking place.
 - b) is usually the result of a well-disciplined teacher.
 - c) does not, in itself, necessarily imply that learning is taking place.

5. An outward manifestation of discipline in the classroom is
 - a) a sense of acceptable concern or apprehensiveness.
 - b) cooperation of participants resulting in a smooth running process.
 - c) a lesson finishing exactly on time.

6. It is usually the case that a class of
 - a) unmotivated students will be disciplined.
 - b) students who are motivated will be easy to manage.
 - c) unmotivated students will seek confrontations.

7. Rather than inevitable cause and effect there is a probability that
 - a) a lesson which is going according to plan is more likely to be disciplined
 - b) well prepared activities will not result in a disciplined class.
 - c) the lesson will not proceed according to plan if the teacher moves around the class.

8. Even though students may be quite unaware of the objective of the lesson
 - a) they will nevertheless wish to discuss the process taking place in their own language.
 - b) they will, as a result of shared knowledge, usually be motivated.
 - c) they can be amenable to the control of the teacher and the class as a while disciplined.
